DIRECTION OF USE

Following steps will guide you to proper use:

1. Remove the cap by pull out, keep in dust free place.
2. Locate delivery nozzle spray point.
3. Hold the spray bottle with 4 fingers except the thumb finger so that the sprayer pointer faces towards the direction of fingers and thumb fingers freely able to press the spring loaded bottle head. For the first time use, just hold bottle in above said position, spray in open space to ensure, the spray is getting proper fumigation without dripping.
4. Before refueling. Please refer the table for determining number of spray to be applied.

Advice: Good fumigation and emerging of fumigated particle in the fuel pipe is an important for getting maximum benefits with the use of M1BOOSTER.

Troubleshooting: M1BOOSTER designed for trouble-free use, however, if the cap is not properly closed, or the atomizer is exposed to open air for a long time, Atomizer is placed in the dirt area, or the atomizer not used for a longer time, there is a possibility of atomizer gets blogged, the atomizer will not be perfect. If this type is noticed, kindly wipe the nozzle with a wet cloth, shake the M1BOOSTER case, and press for strong spray. Now M1BOOSTER is ready to use.

Disposal of empty sprayer: M1BOOSTER designed for eco-friendly, and material used is recyclable. Disposal empty sprayer's case into the recycle material bin.
